

**W**elcome to the 45<sup>th</sup> Annual Meeting of the Pancreas Club. The Mission of the Pancreas Club, since its founding in 1966, is to promote the interchange of ideas between pancreatologists throughout the world and to maintain an informal "club" atmosphere.

This year the Pancreas Club received over **180** abstracts which were reviewed by the Program Committee. We know that you will be fully engaged in both listening to the excellent presentations and in the discussions which follow. Poster authors will be available posterside during the two Poster Sessions.

This meeting will offer continuing medical education credits through a joint sponsorship with the American College of Surgeons. We thank them for their support of this important meeting. We hope this provides a benefit to your CME needs and appreciate your support of this meeting.

The abstracts selected for oral and poster presentation are included in this program book and are available on our website.

The Pancreas Club is pleased to announce two awards for 2010 which will be presented at the Sunday evening dinner.

**PanCan Research Award.** \$1,000 for the best oral presentation of clinical or basic science pancreatic cancer research by a resident or fellow. This award is funded by the Pancreatic Cancer Action Network

**Kenneth Warren/Pancreas Club Research Award.** \$1,000 for the best oral presentation of clinical or basic science pancreatitis or pancreatic cancer research by a resident or fellow. This award is funded by the Pancreas Club and the Kenneth Warren Foundation

## 2011 Dinner Honoree

### Edward Bradley

This year, the Pancreas Club is honoring Edward L. Bradley, III, MD, for his distinguished career in surgery and for his longstanding commitment to our organization.

Dr. Bradley received his undergraduate education at Haverford College and his medical degree at Temple University Medical School. He received his surgical training at Duke University Hospital and the University of Miami School of Medicine and was a recipient of an NIH training grant in academic surgery. He has held leadership positions as Piedmont Professor of Surgery and William G. Whitaker Jr. Professor of Surgery at Emory University School of Medicine, Professor and Vice-Chairman of the Department of Surgery at the State University of New York, and currently as Professor of Clinical Sciences in Surgery at Florida State University College of Medicine. He has served with distinction as Chief of Surgery at Grady Memorial Hospital and at Buffalo General Hospital and has held leadership positions in numerous professional societies. Dr. Bradley has been a pioneer in pancreatic surgery and diseases – particularly acute pancreatitis. In the pre-CT era and based on just ultrasound and clinical observation Ed determined that a pancreatic pseudocyst or pancreatic fluid collection could spontaneously regress. He had discovered that these fluid collections might not mature but rather disappear. All peripancreatic fluid collections did not have to be treated. Since the terminology of acute pancreatitis was so diverse he grappled to develop standardized terminology. "There must be a better term than phlegmon." What were the indications for operative vs. non operative management of necrotizing pancreatitis? As a result he organized the Atlanta Symposium in 1992 which established a clinically based classification of acute pancreatitis that has endured to the present. Please join us to recognize Dr Bradley's contributions to pancreatology.
